

## **Medication Therapy Management Programs**

Commonwealth Care Alliance offers medication therapy management (MTM) programs to members who take a number of different drugs, have chronic diseases (such as asthma, diabetes, or chronic heart failure), and have high annual drug costs.

If you meet these three qualifications, you may be eligible for extra help in taking your medications, including extra education, and one-on-one meeting with clinical pharmacists in your local drug store. The MTM programs were designed by doctors and pharmacists to help us provide the best possible care to our members by better managing their medications. If you qualify for the MTM programs, we will contact you for participation.

**Questions?** Please contact Basem Shebli, Director of Pharmacy, at (617) 426-0600 ext. 238 or [bshebli@commonwealthcare.org](mailto:bshebli@commonwealthcare.org)
